

# Phase 1: Pre-Event Preparation

- Planning and Coordination
  - Task: Define project scope, objectives, and success criteria.
  - Task: Create a detailed project timeline and milestones.
  - Task: Assign team roles and responsibilities for pre-event tasks.
  - Task: Schedule regular team meetings to discuss progress and updates.

## Website Development

- Task: Design wireframes and mockups for the campaign website.
- Task: Develop frontend for the campaign website's homepage and key sections.
- Task: Implement backend functionality for donation forms, registration, and content management.

- Task: Conduct usability testing and ensure responsiveness across devices.

## Marketing and Promotion

- Task: Develop a comprehensive marketing strategy to promote the event.
- Task: Design marketing materials, including banners, posters, and digital assets.
- Task: Launch and manage a social media campaign across platforms.
- Task: Coordinate with local media for press releases and coverage.

## Partnership and Sponsorship

- Task: Identify and approach potential partners and sponsors aligned with the campaign's goals.
- Task: Prepare partnership proposals outlining benefits and collaboration opportunities.
- Task: Negotiate sponsorship details, including financial contributions and in-kind support.
- Task: Finalize partnership agreements and ensure all commitments are documented.

## Phase 2: Event Execution

### Setup and Logistics

- Task: Secure venues and setup e-waste collection points across designated locations.
- Task: Coordinate logistics for transportation, setup, and dismantling of collection points.
- Task: Ensure compliance with local regulations and environmental standards.
- Task: Provide training and guidelines to volunteers and staff on event day logistics.

### Educational Workshops and Activities

-

- - Task: Plan and schedule educational workshops on e-waste recycling and environmental sustainability.
  - Task: Develop workshop materials, presentations, and interactive activities.
  - Task: Invite and confirm speakers and facilitators for workshops and panel discussions.
  - Task: Promote workshops through online channels, partner networks, and local communities.
- Event Day Operations
  - Task: Manage event day schedule and oversee activities at collection points and workshop venues.
  - Task: Monitor participant registrations and ensure smooth flow of activities.
  - Task: Address any logistical issues or emergencies promptly.
  - Task: Collect data and feedback from participants for post-event evaluation.

## 1. Phase 3: Post-Event Activities

- Feedback and Evaluation
  - Task: Gather feedback from participants, partners, and sponsors regarding their experience and suggestions.
  - Task: Analyze feedback to assess event success and identify areas for improvement.
  - Task: Prepare a detailed post-event report highlighting achievements, challenges, and recommendations.
- Follow-Up and Thank You
  - Task: Send thank-you notes and certificates of appreciation to sponsors, partners, and volunteers.
  - Task: Follow up on any outstanding commitments or deliverables agreed upon with partners.
  - Task: Update the campaign website and social media platforms with event highlights and outcomes.

# General Tasks

- Documentation and Reporting
  - Task: Document all project activities, including planning documents, marketing materials, and event logistics.
  - Task: Prepare a comprehensive final report summarizing the campaign's impact, lessons learned, and future recommendations.
  - Task: Present findings and recommendations to stakeholders and management.

# Overview

**Event Name:** Clean Tech for a Green Future - Mandela Day E-Waste Recycling Campaign

**Objective:** Promote responsible e-waste disposal, raise environmental awareness, and encourage community participation.

## Website Features

- **Essential Sections:**
  - Home
  - About the Campaign
  - Event Details
  - Partners and Sponsors
  - Get Involved
  - Resources
  - Contact Us
  - Feedback
- **Interactive Elements:**
  - Quizzes
  - Games

## Key Steps

2. **Planning and Design:** Define content, create wireframes, and design mockups.
3. **Development:** Implement the design, develop functionalities, and create interactive elements.
4. **Testing:** Conduct thorough testing and gather feedback.
5. **Launch:** Deploy the website and promote new features.

## Timeline

- **Week 1:** Planning and Design
- **Week 2:** Development and Testing
- **Week 3:** Final Testing and Launch

## Tasks for the Team

6. **Project Management:**

- Oversee the project, ensure timelines and deliverables are met.
- Use ClickUp for task management.

**7. Design Team:**

- Create wireframes and design mockups.
- Ensure the design is engaging and user-friendly.

**8. Frontend Developers:**

- Implement design using HTML, CSS, and JavaScript.
- Ensure responsiveness and cross-browser compatibility.

**9. Backend Developers:**

- Develop server-side logic and database integration.
- Ensure secure and efficient data handling.

**10. Game Developers:**

- Use game development tools (like Phaser.js) to create interactive games.
- Implement educational and engaging game content.

**11. QA Team:**

- Test the website for functionality, user experience, and compatibility.
- Conduct beta testing to gather feedback and identify issues.

**12. Deployment Team:**

- Deploy the website and perform final checks.
- Ensure smooth launch and monitor for any post-launch issues.

**13. Marketing Team:**

- Promote the new features through social media, newsletters, and partner channels.
- Engage the community and encourage participation.

## Additional Elements

- **Quizzes and Games Section:**

- **Quizzes:**
  - E-Waste Knowledge Quiz
  - Mandela Day Quiz
- **Games:**
  - Recycling Sorting Game
  - Eco-Friendly Journey Simulation Game

## Sample Code for a Quiz

Here's a simple example of a quiz implemented in HTML and JavaScript:

html

Copy code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-
scale=1.0">
  <title>E-Waste Knowledge Quiz</title>
  <style>
    body { font-family: Arial, sans-serif; margin: 20px; }
    .quiz-container { max-width: 600px; margin: auto; }
    .question { font-weight: bold; }
    .answers { list-style-type: none; padding: 0; }
    .answers li { margin: 10px 0; }
    .result { font-size: 1.2em; }
  </style>
</head>
<body>
  <div class="quiz-container">
    <h1>E-Waste Knowledge Quiz</h1>
    <div id="quiz">
      <!-- Quiz questions will be dynamically inserted here -->
    </div>
    <button onclick="submitQuiz()">Submit Quiz</button>
    <div id="result" class="result"></div>
  </div>

  <script>
    const quizData = [
      {
        question: "What is e-waste?",
        answers: ["Electronic waste", "Energy waste",
"Environmental waste", "Educational waste"],
        correct: "Electronic waste"
      },
      {
        question: "Which of the following is an example of e-
waste?",
```

```

        answers: ["Plastic bottle", "Old smartphone",
"Cardboard box", "Glass jar"],
        correct: "Old smartphone"
    }
];

function loadQuiz() {
    const quizDiv = document.getElementById('quiz');
    quizData.forEach((q, index) => {
        const questionDiv = document.createElement('div');
        questionDiv.classList.add('question');
        questionDiv.innerHTML = `<p>${q.question}</p>`;
        const answersList = document.createElement('ul');
        answersList.classList.add('answers');
        q.answers.forEach(answer => {
            const answerItem = document.createElement('li');
            answerItem.innerHTML = `<label><input type="radio"
name="q${index}" value="${answer}"> ${answer}</label>`;
            answersList.appendChild(answerItem);
        });
        questionDiv.appendChild(answersList);
        quizDiv.appendChild(questionDiv);
    });
}

function submitQuiz() {
    let score = 0;
    quizData.forEach((q, index) => {
        const selectedAnswer =
document.querySelector(`input[name="q${index}"]:checked`);
        if (selectedAnswer && selectedAnswer.value ===
q.correct) {
            score++;
        }
    });
    const resultDiv = document.getElementById('result');
    resultDiv.innerHTML = `You scored ${score} out of
${quizData.length}`;
}

```

```
        window.onload = loadQuiz;
    </script>
</body>
</html>
```

## Event Details

- **Name:** Clean Tech for a Green Future - Mandela Day E-Waste Recycling Campaign
- **Date:** July 18, 2024
- **Location:** Multiple collection points across the city
- **Activities:**
  - E-waste collection and recycling
  - Educational workshops and seminars
  - Interactive quizzes and games on the website
  - Partner and sponsor engagement
  - Community involvement and volunteer opportunities

## Final Steps

14. **Review:** Ensure all sections are complete and integrated.
15. **Feedback:** Gather final feedback from team and stakeholders.
16. **Finalize:** Make necessary adjustments based on feedback.
17. **Launch:** Deploy the website and start the campaign.

## Conclusion

This comprehensive guide covers all aspects of the Mandela Day E-Waste Recycling Campaign, ensuring a successful and engaging event. If there are any additional elements or specific changes you'd like to include, please let me know!
